

# Nanos Strategy Package

The Nanos Strategy Package is a critical resource and strategic advantage you can call-up over an entire year. It includes 3 core components:

- **Research** - 10 National Omnibus questions. Understanding how the public landscape shifts is the foundation for success. Your questions can be deployed all at once, or staggered throughout the year based on your needs. Nanos can provide you with a 'here and now' look at the public landscape, as well as provide you with the insight needed to track changes over time.
- **Strategy** - 1 Strategic Assessment or Thought Piece on an issue of your choice. Nanos' proprietary approach includes a diagnosis of the environment which helps form the strategy roadmap forward.
- **Insight** - 2 Sessions with CEO Nik Nanos. Whether it is a Board briefing at your AGM or a team meeting within your organization, these sessions provide you with the opportunity to get expert insight and jump start the strategic process

## Flexibility to Choose the Best Approach for Your Needs

Each component can be called upon individually or in conjunction with other Strategy Package components over the one year subscription period. Whether you combine the elements of the package for one project or call up each piece as needed, the value of the Nanos Strategy Package comes from giving you the power to pick and choose how and when you want each component delivered.

For a yearly fixed cost you will get customized research, strategy and insight to help you get the big picture and act quickly and effectively on your issues.
