

## Canadians worried about the prospect of a recession

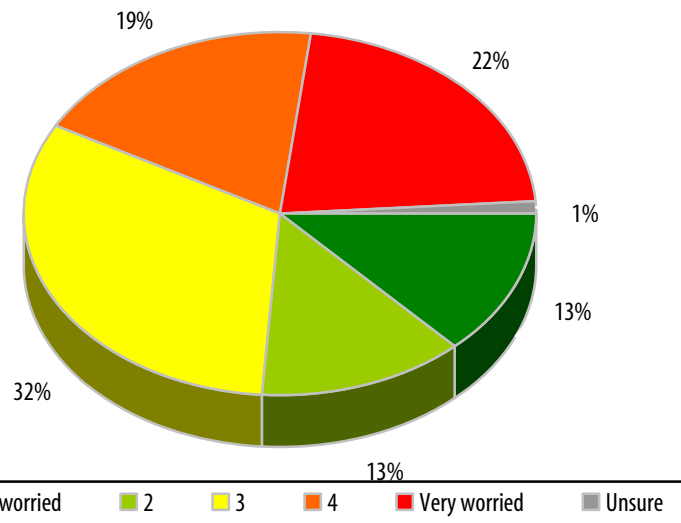

### METHODOLOGY

Between October 7<sup>th</sup> and October 9<sup>th</sup>, 2008, Nanos Research conducted a random telephone survey of 1,203 Canadians 18 years and older. A random telephone survey of 1,203 Canadians is accurate plus or minus 2.8%, 19 times out of 20. Margins of accuracy are wider for subgroup samples. Readers should note that the data was weighted for gender and age to match the Canadian census results. Results should be considered representative of the Canadian population. Results may not add up to 100% due to rounding.

The research was registered with the Marketing Research and Intelligence Association of which Nanos is a Gold Seal Corporate Member.

**QUESTION:** On a scale of 1 to 5 where 1 is not worried at all and 5 is very worried, how worried are you that Canada will go into a recession in the next year?
