

Perceptions of Canadians on Olympic boycott

Methodology

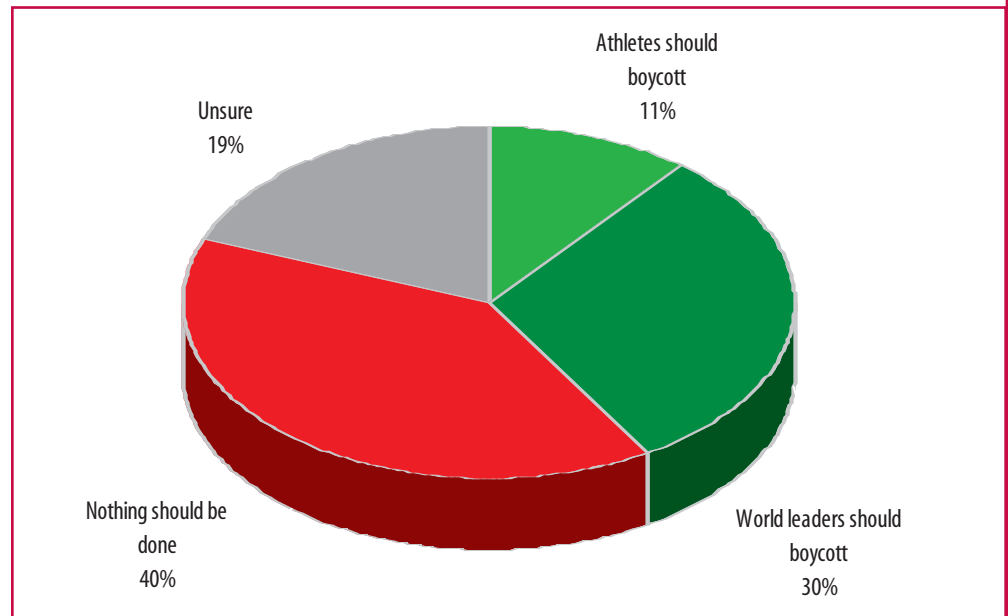

Between May 1st and May 6th, 2008, Nanos Research conducted a random telephone survey of 1002 Canadians 18 years and older.

A random telephone survey of 1002 Canadians is accurate $\pm 3.1\%$, 19 times out of 20. Margins of accuracy are wider for subgroup samples. Readers should note that the data was weighted for gender and age to match the Canadian census results. Results should be considered representative of the Canadian population. Results may not add up to 100% due to rounding.

The research was registered with the Marketing Research and Intelligence Association of which Nanos is a Gold Seal Corporate Member.

Question: As you may know, there has been some controversy related to the Beijing Olympics and demonstrations in Tibet. Which of the following statements best reflects your personal views? [ROTATE]
