

Canadians more likely to identify with Greens on environment than any other federal party

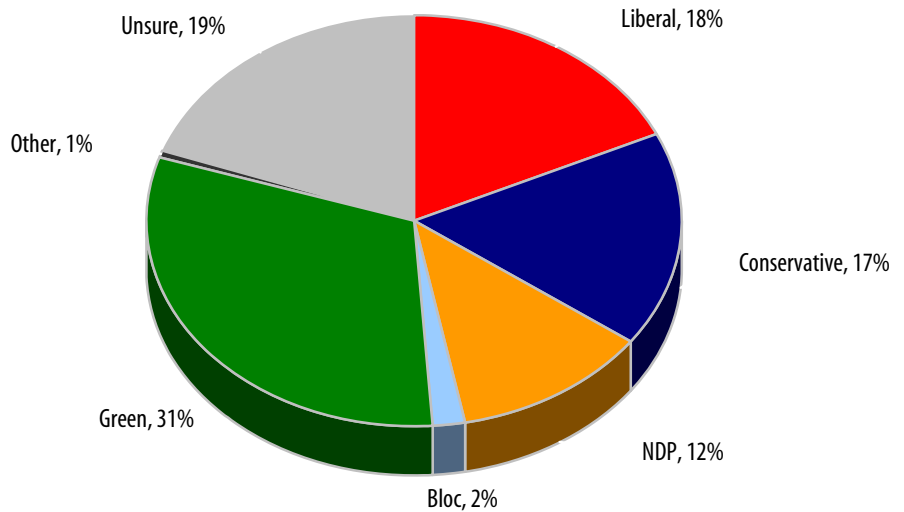

METHODOLOGY

Between September 16th and September 18th, 2008, Nanos Research conducted a random telephone survey of 1,200 Canadians 18 years and older. A random telephone survey of 1,202 Canadians is accurate plus or minus 2.8%, 19 times out of 20. Margins of accuracy are wider for subgroup samples. Readers should note that the data was weighted for gender and age to match the Canadian census results. Results should be considered representative of the Canadian population. Results may not add up to 100% due to rounding.

The research was registered with the Marketing Research and Intelligence Association of which Nanos is a Gold Seal Corporate Member.

QUESTION: Which federal party best reflects your views on the environment?
