Ontario Perceptions on Best Mayor of Toronto

SES/680News Poll

Methodology

Between September 30th and October 3rd, 2006, SES Research conducted a random telephone survey of 500 Ontarians 18 years and older.

The aggregate survey results are accurate $\pm 4.4\%$, 19 times out of 20. Margins of accuracy are wider for subgroup samples. Readers should note that the data was weighted for gender and age to match the latest Canadian census results for Ontario. Results should be considered representative of the Ontario population. Results may not add up to 100% due to rounding.

The initiative was part of the SES Ontario Omnibus Survey and was registered with the Marketing Research and Intelligence Association of which SES is a Gold Seal Corporate Member.
