19 of 20 Ontarians support bill on reporting child pornography

Methodology

Between March 30th and April 1st, 2008, Nanos Research conducted a random telephone survey of 501 Ontarians 18 years and older.

A random telephone survey of 501 Ontarians is accurate $\pm 4.4\%$, 19 times out of 20. Margins of accuracy are wider for subgroup samples. Readers should note that the data was weighted for gender and age to match the Canadian census results for Ontario. Results should be considered representative of the Ontario population. Results may not add up to 100% due to rounding.

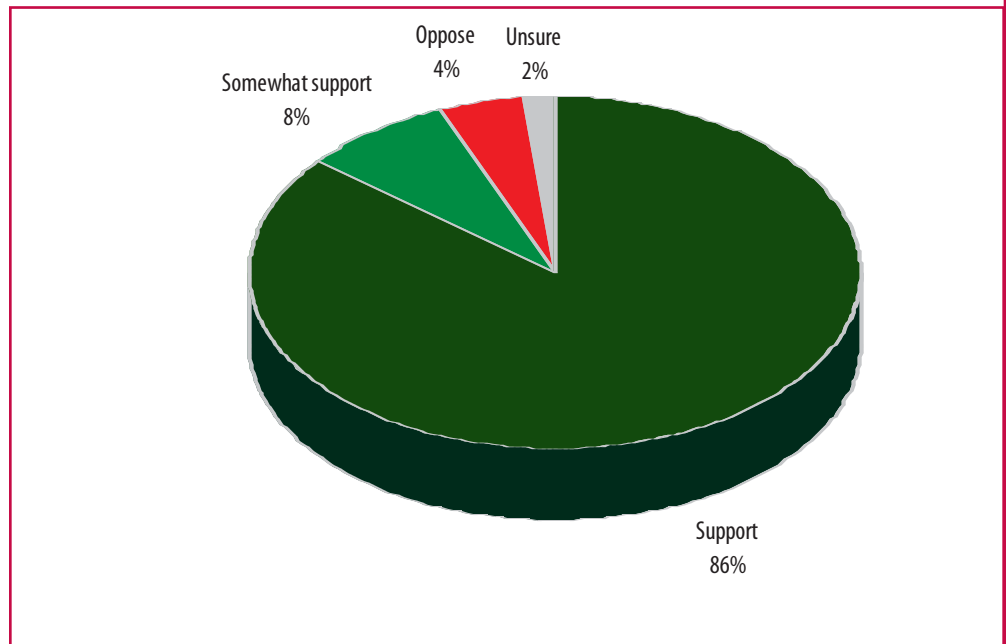

The initiative was part of the monthly Nanos Ontario Omnibus Survey and was registered with the Marketing Research and Intelligence Association of which Nanos is a Gold Seal Corporate Member.

Question: As you may know, a private member's bill is before Ontario's Legislature that would, if passed, require anyone who sees child pornography anywhere to report it to the police. Do you support, somewhat support, somewhat oppose or oppose such a proposed law?
