

STAT SHEET – ONTARIO OMNI 200802

Question - As you may know, Canada's federal atomic agency has spent 17 years and over \$600 million building two nuclear-medicine reactors in Chalk River that have never worked. Which of the following options do you think the Government of Canada should do?

		Total	Sell the reactors to the private sector	Invest more government money in the reactors	Close the reactors and not sell them to a third party	Initiate a private-public partnership with funds from the government and the private sector	Unsure
